RE: Data Center

Attached is a Feasibility Study performed by Tri-State G & T Association for interconnection to either Bluewater Substation or San Fidel Substation. Please note that this study and its estimates are high level and a more detailed SIS of the same code (SIS-21-CD02) would be pursued if this customer chooses to submit an official Delivery Point Application (DPA).

There are no rate incentives or interruptible rates available through Continental Divide Electric Cooperative, Inc. Attached is our Large Industrial Transmission Rate that would be charged for this service.

Sincerely,

Donna Venable  
Regulatory and Rates Manager
